

UHC Survey Year 2
Healthcare Worker Survey Questionnaire

Consent Form for Healthcare Workers

This informed consent form must be obtained before conducting the interview. You are required to read this entire consent form aloud exactly as written. After reading this form to the respondent, you must complete and sign the verification consent form.

PART I: Information about the study

The Asian Social Project Services, Inc. (ASPSI) requests your participation in a study on Universal Health Care (UHC). This study aims to generate evidence on the overall experience of the healthcare service providers and the general public to support continuous monitoring, evaluation, and learning of the implementation of the UHC Act, its Implementing Rules and Regulations (IRR), and packages of programs like ***Yaman ng Kalusugan Program (YAKAP)***, ***No Balance Billing (NBB)***, ***Zero Balance Billing (ZBB)***, ***Bagong Urgent Care and Ambulatory Services (BUCAS)*** centers, and ***Guaranteed and Accessible Medications for Outpatient Treatment (GAMOT)***. The Department of Health funded this study. The interview may last for more or less than an hour.

We are committed to protecting your privacy. If you choose to participate, we will never share your information outside of the study team. We will never include your name in information shared with the government or in any reports. Your name will be kept separately from your answers in a private, secure location. For this interview, it is also important to respect other people's privacy and not tell anyone else what we talked about today. With all research, there's a small chance that someone else might get to see your data. We try our best to prevent that, but if it happens, we'll tell you as soon as possible.

Aside from this, there are no other risks to you if you take part in this study. As a benefit of the research, the knowledge gained may help the government and DOH better support your healthcare needs. The interview may last for more or less than an hour and participating in this survey will also enter you into a raffle, giving you a chance to win Php1,000 as a way of thanking you for the time you've shared with us.

You are free to decline participation or to stop at any time. Choosing not to participate will not result in any penalty, and you will not have to pay anything to take part in this study.

If you have concerns or questions about your rights as a participant, you can contact:
